PROFESSIONAL SUMMARY

Product and UX designer with an MFA in Design and Technology (Parsons) and a background in creative strategy at TikTok and Universal Music Group. I design systems with rigor and purpose, from a solo-built, accessibility-first React Native app to modular design systems that non-designers can run without breaking the brand. I am at home in research, IA, and visual systems as much as in code (React Native and TypeScript), and I back my work with measurable outcomes.

CORE COMPETENCIES

Product Design

UX Research

Design Systems

Accessibility (WCAG)

Visual & Type Systems

Front-End (React Native / TS)

PROJECTS

Fresh Greens Solo Designer & Engineer · MFA Thesis

A React Native and Expo wayfinding app for Black travel in America, designed and shipped solo. Accessibility front and center: a WCAG dash-pattern for the daylight cue, dynamic type, and VoiceOver support. Built on a three-layer architecture that keeps every safety decision auditable, with a reserved-color UI signaling system.

React Native, TypeScript, Expo · OpenStreetMap, OSRM, SunCalc, Mapbox · WCAG, dynamic type, VoiceOver

UnderstandingFAFSA Product Designer

Redesigned the newsletter system for a nonprofit guiding families through financial aid. Built modular, responsive Figma-to-Mailchimp templates with locked-vs-swappable rules, so a non-designer founder could ship on-brand without breaking the system. Open rates rose from about 30% to 52.6%, roughly a 75% lift.

Figma, Mailchimp · design systems, content design, responsive email, brand stewardship

Navi UI/UX Designer

A travel platform connecting NYC visitors to neighborhood-level experiences. Ran resident-led research, built three personas, and defined the IA, the Learn/Plan/Go framework, and a full visual system. Concept testing showed 78% preferred neighborhood-led recommendations over top-ten lists.
